New Features

UNICOS® File Formats and Special Files Reference Manual

SR-2014 10.0

This rewrite of the *UNICOS File Formats and Special Files Reference Manual*, Cray Research publication SR-2014, supports the 10.0 release of the UNICOS operating system. The following changes have been made:

- Addition of `arrayd.conf(5)` to support the array session feature.
- Revision of `quota(5)` to support the optional aggregate quota feature.
- Addition of `text_tapeconfig(5)` to replace `tapeconfig`. The default configuration file is now `text_tapeconfig`. This updated command provides information about overcommitted mount requests: the new `-a` option outputs device status. The `DEVICE` statement provides support for IBM ESCON tape devices: the new `timeout` parameter specifies the time-out value in seconds that the ESCON IOP waits for a response from the channel, and the `type` parameter now accepts 3590 as a type.

Record of Revision

<i>Version</i>	<i>Description</i>
1.0	March 1986 Original Printing. This documentation supports the UNICOS 1.0 release.
1.1	June 1986 Online documentation only. This documentation supports the UNICOS 1.1 release.
2.0	October 1986 This documentation supports the UNICOS 2.0 release.
3.0	July 1987 This documentation supports the UNICOS 3.0 release.
4.0	July 1988 This documentation supports the UNICOS 4.0 release.
5.0	February 1989 This documentation supports the UNICOS 5.0 release.
6.0	January 1991 This documentation supports the UNICOS 6.0 release.
7.0	July 1992 This documentation supports the UNICOS 7.0 release.
8.0	January 1994 This documentation supports the UNICOS 8.0 release.
9.0	September 1995 This documentation supports the UNICOS 9.0 release.
10.0	November 1997 This documentation supports the UNICOS 10.0 release.

Preface

This publication documents UNICOS release 10.0 running on CRAY PVP and CRAY T3D systems.

Related publications

The following man page manuals contain additional information that may be helpful.

Note: For the UNICOS 10.0 release, man page reference manuals are not orderable in printed book form. Instead, they are available as printable PostScript files provided on the same DynaWeb CD as the rest of the supporting documents for this release. Individual man pages are still available online and can be accessed by using the `man(1)` command.

- *UNICOS User Commands Reference Manual*, Cray Research publication SR-2011
- *UNICOS System Calls Reference Manual*, Cray Research publication SR-2012
- *UNICOS Administrator Commands Reference Manual*, Cray Research publication SR-2022
- *UNICOS System Libraries Reference Manual*, Cray Research publication SR-2080

The following ready references are available in printed form from the Distribution Center:

- *UNICOS User Commands Ready Reference*, Cray Research publication SQ-2056
- *UNICOS System Libraries Ready Reference*, Cray Research publication SQ-2147
- *UNICOS System Calls Ready Reference*, Cray Research publication SQ-2215
- *UNICOS Administrator Commands Ready Reference*, Cray Research publication SQ-2413

Ordering Cray Research publications

The *User Publications Catalog*, Cray Research publication CP-0099, describes the availability and content of all Cray Research hardware and software documents

that are available to customers. Cray Research customers who subscribe to the Cray Inform (CRInform) program can access this information on the CRInform system.

To order a document, either call the Distribution Center in Mendota Heights, Minnesota, at +1-612-683-5907, or send a facsimile of your request to fax number +1-612-452-0141. Cray Research employees may send electronic mail to `orderdisk` (UNIX system users).

Customers who subscribe to the CRInform program can order software release packages electronically by using the `Order Cray Software` option.

Customers outside of the United States and Canada should contact their local service organization for ordering and documentation information.

Conventions

The following conventions are used throughout this document:

<u>Convention</u>	<u>Meaning</u>
<code>command</code>	This fixed-space font denotes literal items such as commands, files, routines, path names, signals, messages, and programming language structures.
<code>manpage(x)</code>	Man page section identifiers appear in parentheses after man page names. The following list describes the identifiers: <ul style="list-style-type: none"> 1 User commands 1B User commands ported from BSD 2 System calls 3 Library routines, macros, and opdefs 4 Devices (special files) 4P Protocols 5 File formats 7 Miscellaneous topics 7D DWB-related information

8 Administrator commands

Some internal routines (for example, the `_assign_asgcmd_info()` routine) do not have man pages associated with them.

variable

Italic typeface denotes variable entries and words or concepts being defined.

user input

This bold, fixed-space font denotes literal items that the user enters in interactive sessions. Output is shown in nonbold, fixed-space font.

[]

Brackets enclose optional portions of a command or directive line.

...

Ellipses indicate that a preceding element can be repeated.

The following machine naming conventions may be used throughout this document:

Term

Definition

Cray PVP systems

All configurations of Cray parallel vector processing (PVP) systems.

Cray MPP systems

All configurations of the CRAY T3D series. The UNICOS operating system is not supported on CRAY T3E systems. CRAY T3E systems run the UNICOS/mk operating system.

All Cray Research systems

All configurations of Cray PVP and Cray MPP systems that support this release.

The default shell in the UNICOS and UNICOS/mk operating systems, referred to in Cray Research documentation as the *standard shell*, is a version of the Korn shell that conforms to the following standards:

- Institute of Electrical and Electronics Engineers (IEEE) Portable Operating System Interface (POSIX) Standard 1003.2-1992
- X/Open Portability Guide, Issue 4 (XPG4)

The UNICOS and UNICOS/mk operating systems also support the optional use of the C shell.

Cray UNICOS Version 10.0 is an X/Open Base 95 branded product.

Man page sections

The entries in this document are based on a common format. The following list shows the order of sections in an entry and describes each section. Most entries contain only a subset of these sections.

<u>Section heading</u>	<u>Description</u>
NAME	Specifies the name of the entry and briefly states its function.
SYNOPSIS	Presents the syntax of the entry.
IMPLEMENTATION	Identifies the Cray Research systems to which the entry applies.
STANDARDS	Provides information about the portability of a utility or routine.
DESCRIPTION	Discusses the entry in detail.
NOTES	Presents items of particular importance.
CAUTIONS	Describes actions that can destroy data or produce undesired results.
WARNINGS	Describes actions that can harm people, equipment, or system software.
ENVIRONMENT VARIABLES	Describes predefined shell variables that determine some characteristics of the shell or that affect the behavior of some programs, commands, or utilities.
RETURN VALUES	Describes possible return values that indicate a library or system call executed successfully, or identifies the error condition under which it failed.
EXIT STATUS	Describes possible exit status values that indicate whether the command or utility executed successfully.
MESSAGES	Describes informational, diagnostic, and error messages that may appear. Self-explanatory messages are not listed.
ERRORS	Documents error codes. Applies only to system calls.

FORTRAN EXTENSIONS	Describes how to call a system call from Fortran. Applies only to system calls.
BUGS	Indicates known bugs and deficiencies.
EXAMPLES	Shows examples of usage.
FILES	Lists files that are either part of the entry or are related to it.
SEE ALSO	Lists entries and publications that contain related information.

Reader comments

If you have comments about the technical accuracy, content, or organization of this document, please tell us. You can contact us in any of the following ways:

- Send us electronic mail at the following address:

`publications@cray.com`

- Contact your customer service representative and ask that an SPR or PV be filed. If filing an SPR, use PUBLICATIONS for the group name, PUBS for the command, and NO-LICENSE for the release name.
- Call our Software Publications Group in Eagan, Minnesota, through the Customer Service Call Center, using either of the following numbers:

1-800-950-2729 (toll free from the United States and Canada)
+1-612-683-5600
- Send a facsimile of your comments to the attention of "Software Publications Group" in Eagan, Minnesota, at fax number +1-612-683-5599.

We value your comments and will respond to them promptly.
