

## A

- ACPTBAD routine, 58, 62
- ANSI standard labels, 17
- Architecture, 4
- assign command
  - COS blocking mode, 79
  - foreign data conversion, 56
  - Fortran procedures, 43, 45, 57, 67
  - processing class, 75
  - usage, 41
- Autoloaders, 3

## B

- Bad data, 58
- Basic tape procedures, 25
- Block size definition, 2
- Blocked file section definition, 90
- Blocks
  - identifiers, 130
  - length, 22
  - read/write (maximum), 90
  - tape positioning, 44
- Buffered I/O, 91
- Bypass-label processing definition, 6
- Byte stream file definition, 90

## C

- C applications, 81, 122
- C examples
  - ctl\_extsts structure, 108
  - ctl\_rdllog structure, 113
  - data block size, 116
  - dmn\_comm structure, 118
  - ER90 devices, 93–95

- executing cexam2.c, 85
- flexible file I/O usage, 82
- IBM compatible devices, 93, 95
- library routine usage, 82
- reading tape files, 93, 94
- synchronizing your program with a tape, 118
- table header, 96
- tape information table usage, 97
- TPC\_EXTSTS request, 109, 111
- TPC\_RDLOG request, 113, 115
- TR\_INFO request, 100, 104
- transparent buffered I/O, 91, 92
- writing tape files, 95

Cassettes, 23

- cd command, 34, 35
- CDC data types, 50
- CDC2CRAY routine, 51
- Character-special tape interface, 3, 121
- CHECKTP routine, 65
- CLOSE statement, 63
- close system call, 5
- CLOSEV routine, 65
- Closing tape files, 25, 122

Commands, 32

- assign
  - COS blocking mode, 79
  - Fortran applications, 79
  - Fortran procedures, 41, 45, 47, 49, 52, 57, 67, 70, 73
  - processing class, 75
  - tape marks, 43
- cd, 34, 35
- cp, 32, 36
- cpio, 35
- dd, 33
- f90, 41, 43, 45, 52, 57, 70, 73, 77, 79
- man command, 25
- msgi, 31

- msgcr, 31
- qsub, 27
- rls
  - basic procedure, 25, 31
  - contents display, 29
  - Fortran applications, 42, 44, 45, 52, 57, 67, 70, 73, 76, 77, 80
  - tutorial procedures, 33–38
- rsv
  - basic procedure, 25
  - contents display, 29
  - Fortran applications, 41, 43, 44, 46, 49, 52, 56, 67, 70, 73, 77, 79
  - tape log, 30
  - tutorial procedures, 32–35, 37
- segldr, 77
- target, 36
- tpformat, 25
- tplist, 29
- tpmnt
  - basic procedure, 25, 31
  - concatenated files, 35
  - contents display, 29
  - creating tapes, 17
  - ER90 devices, 38
  - Fortran applications, 41, 43, 45, 47, 49, 52
  - multifile tapes, 36
  - system buffering, 8
  - tape formats, 11
  - tutorial procedures, 32–36
- tprst, 28
- tpstat, 25, 29
- Communications, 6
- Computer systems, 3, 89
- Concatenated tape files
  - EOV status, 7
  - tpmnt command, 35
- Copying files, 32, 33
- COS blocking mode, 79
- cp command, 32, 36
- cpio command, 35
- CRAY J90 series, 90
- Cray Research systems, 3, 89

- CRAY2CDC routine, 51
- CRAY2IBM routine, 51
- CRAY2IEG routine, 51
- CRAY2NVE routine, 51
- CRAY2VAX routine, 51
- ctl\_extsts structure, 108
- ctl\_rdlog structure, 113

## D

- Data conversion, 50
- Data types, 50
- dd command, 33
- Default tape formats, 24
- Definitions, 2, 6, 24, 90
- Device group definition, 2
- Device name definition, 2
- Device type definition, 2
- Devices, 3
- Diagrams, 4, 11, 130
- Directives
  - #define MAXPATH, 99
  - #define TR\_INFO, 104
  - #define U\_REQPIPE, 99
  - #define USER\_DIR, 99
- dmn\_comm structure, 117

## E

- End-of-tape detection, 6
- ENDSP routine, 65
- Environment variables, 99
- EOF1 labels, 13, 16, 19
- EOF2 labels, 13, 17, 21
- EOV processing, 7, 65, 84, 116
- EOV1 labels, 13, 16, 19
- EOV2 label, 17
- EOV2 labels, 13, 21
- ER90 devices, 11, 23, 25, 38, 41, 75, 81, 90
- Error-handling routines, 58

**Errors**

- hardware error codes, 144
- I/O request codes, 123
- messages, 147

**Examples, 42**

- ( See also C examples ), 82
- creating a tape, 26
- new files, 27
- NQS tape job, 27
- reading tape files, 27
- tape.msg listing, , 31
- tplist status display, 30
- tprst status display, 28
- tpstat status display, 29

**Explicit data conversion, 50****External ID definition, 3****F**

- ff90 command, 41, 43, 45, 52, 57, 67, 70, 73, 77, 79
- ffbksp routine, 81
- ffclose routine, 81
- ffcntl routine, 82, 84
- ffopen routine, 81
- ffpos routine, 82, 84
- ffread routine, 81
- ffseek routine, 81
- ffweof routine, 81
- ffwrite routine, 81
- File identifier definition, 2
- Files

( See character-special tape ), 122

**Flexible file I/O (FFIO), 9, 81****Foreign data conversion, 50****Format ID definition, 3****Format IDs, 24****Formats, 11****Fortran applications, 41****Fortran examples**

- ACPTBAD routine, 61
- block positioning, 45
- COS blocking mode, 79

**EOV processing, 67, 70****foreign data, 56****IBM format conversion, 52****ISHELL routine, 63****mixed data types, 55****pure data mode, 77****reading a multivolume file, 72****reading tape marks, 44****SETTP positioning, 48, 50****SKIPBAD routine, 59****unknown number of records, 54****unlabeled tapes, 42****writing tape marks, 44****Front-end****catalog, 36****servicing, 7****G****GETPOS routine, 76****GETTP routine, 67****GigaRing support, 3****H****Hardware, 3****Hardware error codes, 144****HDR1 labels, 13, 16, 19****HDR2 labels, 13, 16, 21****I****I/O****C applications, 89****flexible file I/O, 81****usage, 122****IBM compatible devices, 41, 89****IBM compatible tape format, 11****IBM data types, 50**

- IBM standard labels, 17
- IBM2CRAY routine, 51
- IEEE data types, 50
- IEG2CRAY routine, 51
- Implicit data conversion, 50, 56
- ioctl system call
  - requests, 107, 121
  - TPC\_ACKERR request, 91
  - TPC\_DMN\_REQ request, 117
  - TPC\_EXTSTS request, 107
  - TPC\_RDLOG request, 107, 113, 115
  - TPC\_SDBSZ request, 90, 116
- IOS Model E (IOS-E), 3
- ISHELL routine, 63

## J

- Job ID definition, 2

## L

- Label support, 6
- Label types, 2, 17
- Library routines
  - EOV processing, 65
  - ffbksp, 81
  - ffclose, 81
  - ffcntl, 82, 84
  - ffopen, 81
  - ffpos, 82
  - ffread, 81
  - ffseek, 81
  - ffweof, 81
  - ffwrite, 81
- Loaders, 3
- Log files, 30
- Logical volumes, 24

## M

- MAC label, 38
- man command, 25
- Management applications, 121
- Mandatory access control label, 38
- Messages
  - error, 147
  - operator, 31
  - system, 147
- mknod system call, 99
- Mounting tapes, 25
- msgi command, 31
- msgr command, 31
- MTBSF operation code, 129, 128
- MTBSR operation code, 129, 128
- MTCLRLOG operation code, 129, 128
- MTEXTS operation code, 128, 136
- MTFMT operation code, 128, 137
- MTFSF operation code, 129, 128
- MTFSR operation code, 129, 128
- MTGABS operation code, 130, 128
- MTGFMT operation code, 128, 139
- MTGPOS operation code, 132, 128
- MTIOCACKERR request, 124
- MTIOCATTR request, 124
- MTIOCGET request, 124, 125
- MTIOCTOP request, 124, 127
- MTMSG operation code, 128, 144
- MTOFFL operation code, 129, 128
- MTPABS operation code, 130, 128
- MTRDLOG operation code, 129, 128
- MTREW operation code, 129, 128
- MTSEEK operation code, 128, 135
- MTSYNC operation code, 129, 128
- MTTRACE operation code, 128, 143
- MTVERIFY operation code, 128, 142
- MTWEOF operation code, 129, 128
- Multifile tapes
  - multivolume, 14
  - single-volume, 14
- Multifile volume allocation, 7, 36
