Configuration links 19

Getting Started [7] **23**

Preparing your host for a guest 23
General considerations 23
Guest file systems 24
IOS parameter files 24
UNICOS (host) parameter files 25
Guest parameter files 28
Booting the host system 29
Configuring the UNICOS under UNICOS feature 29
Validating a user 32
Device validation 33
`guest.rc` file 35
Checking your configuration 38
Booting a guest to single-user mode 38
Startup 39
Console connections 39
Start-up output example 39
Status 41
Dumping 42
Ending a session 42

Page

Multiuser Mode Guests [8] **45**
Considerations . . . 45
Examples of configuration links . . . 46
Moving to multiuser mode . . . 50

Appendix A Monitoring and Analysis **51**
Status . . . 51
CPU monitoring considerations . . . 51
Dumping . . . 53

Appendix B Troubleshooting **59**
`guest` command fails . . . 59
`cannot open root device` message . . . 59
NQS does not start on the guest . . . 59
Guest does not recognize tape mounts . . . 59
Kernel decompression loops forever . . . 60

Appendix C `guest` Messages **61**

Index **63**
