

757 Labs Hackerspace Passport Stamp v0.1a

- * Left stamp will be used with black ink
- * Right stamp will be used with UV ink (invisible in normal light)
- * Black border around stamp helps keep other stamps away

- * Stamp max size is 41mm x 47mm, so I made these a little smaller
- * Wanted to do some sort of sine wave thru the middle of the UV one, but don't have the AI skills to do it well.
